

## Asbestos Abatement

Asbestos is a naturally occurring mineral recognized for its heat resistance, tensile strength and insulating properties. Used for everything from fire-proof vests to home and commercial construction. Unfortunately it has also been found to be highly toxic and known to cause mesothelioma cancer. It is banned in more than 50 Countries. Experience Matters! We are the **longest standing licenced Asbestos Abatement company in Utah**. We take safety of our employees and clients very seriously, striving to be at the forefront of all removal techniques.

## Lead Removal

Lead is a naturally occurring element found in small amounts in the earth's crust. While it has some beneficial uses, it can be toxic to humans and animals causing of health effects. Our qualified workers are lead certified with the Utah department of Air quality and must maintain a license through annual continuing education. We provide a **full range of lead mitigation techniques** from lead paint stabilization and removal to contaminated soil disposal and others. If you have a concern about your property, please call for an in home evaluation.

## Mold Removal

Molds are part of the natural environment. However indoors, mold growth should be avoided. Molds reproduce by means of tiny spores that are invisible to the naked eye and float through outdoor and indoor air. Mold may begin growing indoors when mold spores land on surfaces that are wet. There are many types of mold, and none of them will grow without water or moisture. Our professional team offers **safe and effective removal and disinfection services** and, if needed, restoration of the damaged area.

## Radon Gas Remediation

Radon is a cancer-causing radioactive gas. You cannot see, smell or taste radon, but it may be a problem in your home. Surgeon General has warned radon is the second leading cause of lung cancer in the United States. Scientific studies of radon exposure indicate children may be more sensitive to radon. Our technicians are **NRPP certified in measurement and mitigation of Radon Gas**, pass rigorous tests and receive continuing education to ensure they stay on the forefront of mitigation techniques. Please call for an in home evaluation.
